

ASLI MP-2B Metallographic Sample Grinder and Polisher

Metallographic Sample Grinder and Polisher

Application:

Grinding and Polishing Machine is suitable for metallographic specimen pre-grinding, grinding and polishing operation, it is the necessary equipment to make metallographic specimen.

Features:

1. It's equipped with cooling device, used to cooling the sample when grinding, to prevent the sample overheating and destroy metallographic organization.
2. The left disc is used for grinding and the right disc for polishing, so 2 people can operate at the same time.
3. It's easy to operation, safe and reliable

Technical Parameters & Accessories:

1. Grinding plate: $\Phi 250\text{mm}$; fast changeable
2. Range of rotating: 0-1280 RPM
3. Rotating speed adjustable, digital display
4. Rotary cooling system device
5. Working Voltage 220V, 50Hz.
6. Accessories: metallographic sand paper, polishing fabric, normal polish plate, magnetic polish plate
