

DOLLY-HAD-3 Transparent Elevator Training System

■ Overview

- The system including computer technology, network communication technology, fire alarm technology, intercom access control technology and security alarm technology and security alarm technology. Suitable for training and teaching of intelligent building and building automation.
- The system structure based on intelligent building models, including fire alarm technology, intercom access control technology and security alarm technology. Each part can run independently, but also realize the linkage.

■ Technical Parameter

- Working power supply: AC 220V \pm 10% 50Hz/60Hz
- Environment temperature: -20°C ~+45°C
- Capacity: < 1kVA
- Total dimension: 4480 X 2040 X 2050mm
