SCT-4525J Constant temperature shrink packaging machine

Summarize:

This machine is widely used in food, electronics, toys, hardware tools, cosmetics, medicines, daily necessities, books, electrical appliances, bamboo and wood appliances and other products. After packaging, it has beautiful appearance, dust-proof, moisture-proof and anti breakage functions. The product image is improved and the cost of packaging is low.

This machine has the following characteristics:

1. combined with advanced contraction wind technology, and improved and unique design and manufacture, uniform air distribution and good shrinkage effect.
2. stainless steel heating pipes, long service life and high energy efficiency.
3. switch, thermostat and other main electrical components are made of famous factory parts, with stable operation and low failure rate.
4. the conveying and air motor is made of famous plant parts with strong power and can work continuously for a long time.
5. the new roller is used for conveying, the outer sleeve is silica gel, high temperature resistant, wear-resistant, non hot film, no deformation, and can be used for a long time.
6. this machine is suitable for various kinds of shrinkable films, such as PVC, PP, POF and so on

technical parameter:

Model	SCT-4525J
Maximum packing size	L Unlimited×W450×H250mm
Use power, power	3φ/220V/380V 6KW
The temperature of the working room	2000-3000/h
Outer size	L1330×W750×H1380mm
Net weight	90kg
