SC-800 Vacuum packaging machine

Publish time 2018-07-03 11:36

Product description

Leading technology sets in Japan and Korea combine vacuum, seal and inflatable functions. The brand motor is free to move up and down, suitable for packaging products of different heights. It can be equipped with conveyor line to facilitate the movement of heavy products. The seal adopts air pressure to completely change the phenomenon that traditional packaging is not firmly sealed. The speed of the vacuum is very fast, and it can be done in only 2-3 seconds.

It is not limited to the size and shape of the products, especially the large size or strange shape objects can be packed in vacuum.

SC-800A has more inflatable function and can fill the necessary gas in the packaging bag.

Applicable scope: apply to electronic products, such as semiconductor, chip, IC and so on, cloth, cotton wool products, sponge and so on, carry out vacuum packing, reduce packing volume, save your logistics cost, fill in nitrogen or other gas for food, vegetables, seafood, electronics and other products, keep fresh, original taste, and prevent impact.

Technical parameters:

Model	SC-800A
Maximum Seal Size	L800*W10mm
Maximum packing size	L800*W450*H900-1350mm
Outer size	L1000*W970*H1640mm
Power and power	1φ220V 50/60Hz 2.0kw
Vacuum pump power	930w
Working pressure	6kg/cm ²
Net weight	180kg
